

OpenCore Sammelthread (Hilfe und Diskussion)

Beitrag von „Macko“ vom 9. August 2020, 17:38

The boot theme is stored in the OC Configurator in EFIResources / Image.

I don't know where in which Menu is another boot theme configured in OC, where are boot icons removed?

In the old Clover there was a Theme folder in which I inserted a theme and confirmed it in the Clover menu.

Thanks for help 😊
