Was ich bisher gelesen habe, scheint man bei diesen 2,5gbit Ethernet manuell auf 1000 baseT umstellen zu müssen.

"and have you tried configuring it manually in system pref>network>(ethernet) advanced>hardware. it resolves most of the issues. even the developer of the kext suggests so. set the parameters as follows:

configure: Manual

Speed: 1000baseT

Duplex: full duplex

MTU standard 1500"
