my settings bios are correctly. I Will test this EFI!
i use Wi-Fi Atheros AR9565, works?
thanks!

my settings bios

Spam the F10 key

Go to Advanced

- Device configuration
 - Don't check Fn key switch (it has to be unchecked in order to the volume and brightness hotkeys work)
 - Change Video memory to 128MB
 - Disable wake on USB
 - Disable Virtualization Technology (VT-x)
 - Set SATA to AHCI
- Built in device option
 - Disable Wake on LAN

Save and reboot in UEFI.
