Hello community,

I am asking for help as we have small community of users of this notebook but almost half year we cannot get sound to work with internal speakers.

At most, using layout 57 sound is working through connected headphones.

hwprobe: <https://linux-hardware.org/index.php?probe=915ab6a317>

codec dump https://github.com/daliansky/X...s/5001322/codec_dump0.txt

Any help are welcome.
