Ozmosis mit macOS Catalina 10.15 - OZ167X-XMAX (extended)

Beitrag von „Raptortosh“ vom 25. August 2020, 14:42

I wrote it in that topic here... [Ozmosis mit macOS Catalina 10.15 - OZ167X-XMAX \(extended\)](#)

Yes, but you need Ocquirks, and i don't know How to Flash that know, maybe [kuckkuck](#) or [cecekpawon](#) Has an idea...

You need New Kernel patches...
