Systembericht ...

Softwareupdate ...

Ethernet I225-LM **Verbunden**

Wi-Fi 6 AX201 **Verbunden**

Bluetooth-PAN **Nicht verbunden**

Status: **Verbunden**

„Ethernet I225-LM“ ist zurzeit aktiviert und hat die IP-Adresse 192.168.0.35.

IPv4 konfigurieren: **DHCP**

This screenshot shows the macOS Network preferences window. On the left, there are three network interfaces: Ethernet I225-LM (green dot, connected), Wi-Fi 6 AX201 (green dot, connected), and Bluetooth-PAN (red dot, not connected). On the right, the Ethernet interface is selected, showing its status as 'Verbunden' (connected) and its IP address as 192.168.0.35. Below this, there is a dropdown menu for IPv4 configuration, which is currently set to 'DHCP'.

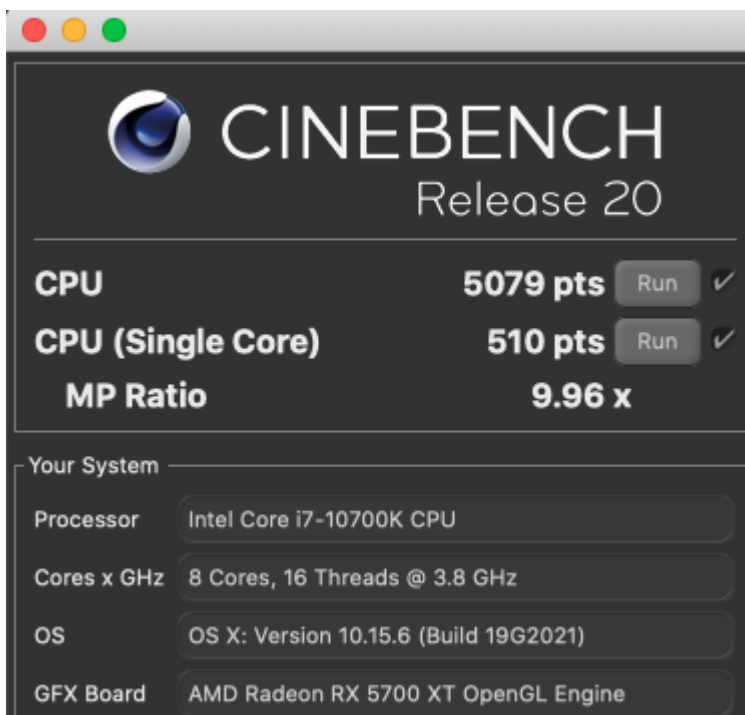

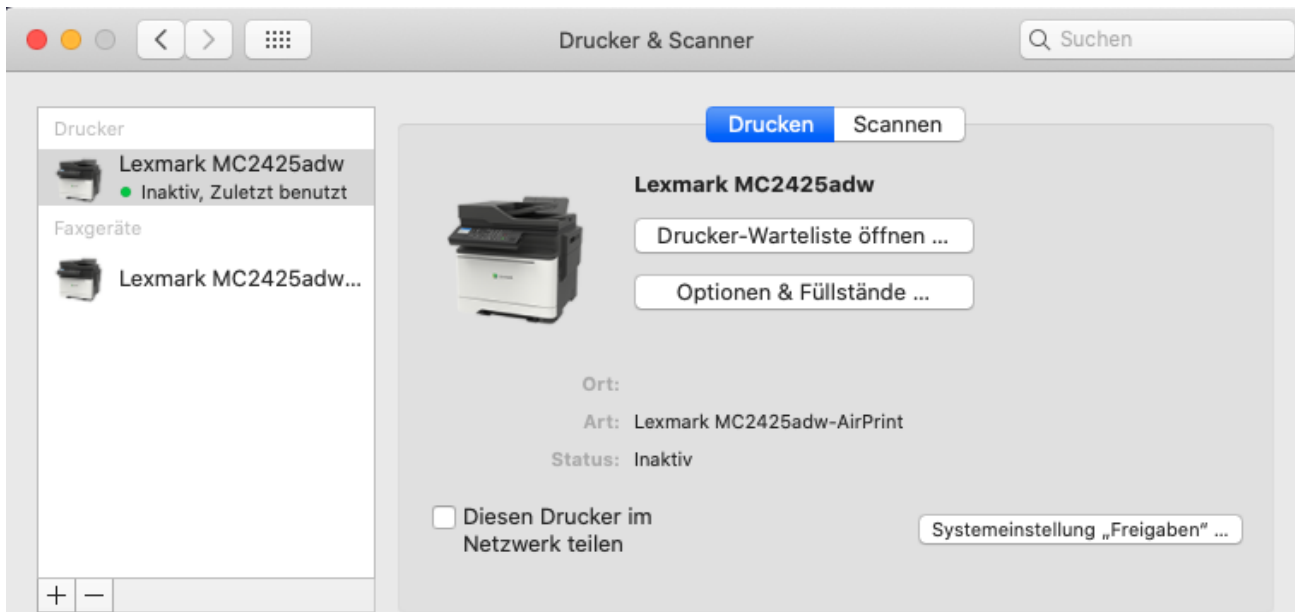

Bluetooth: Ein

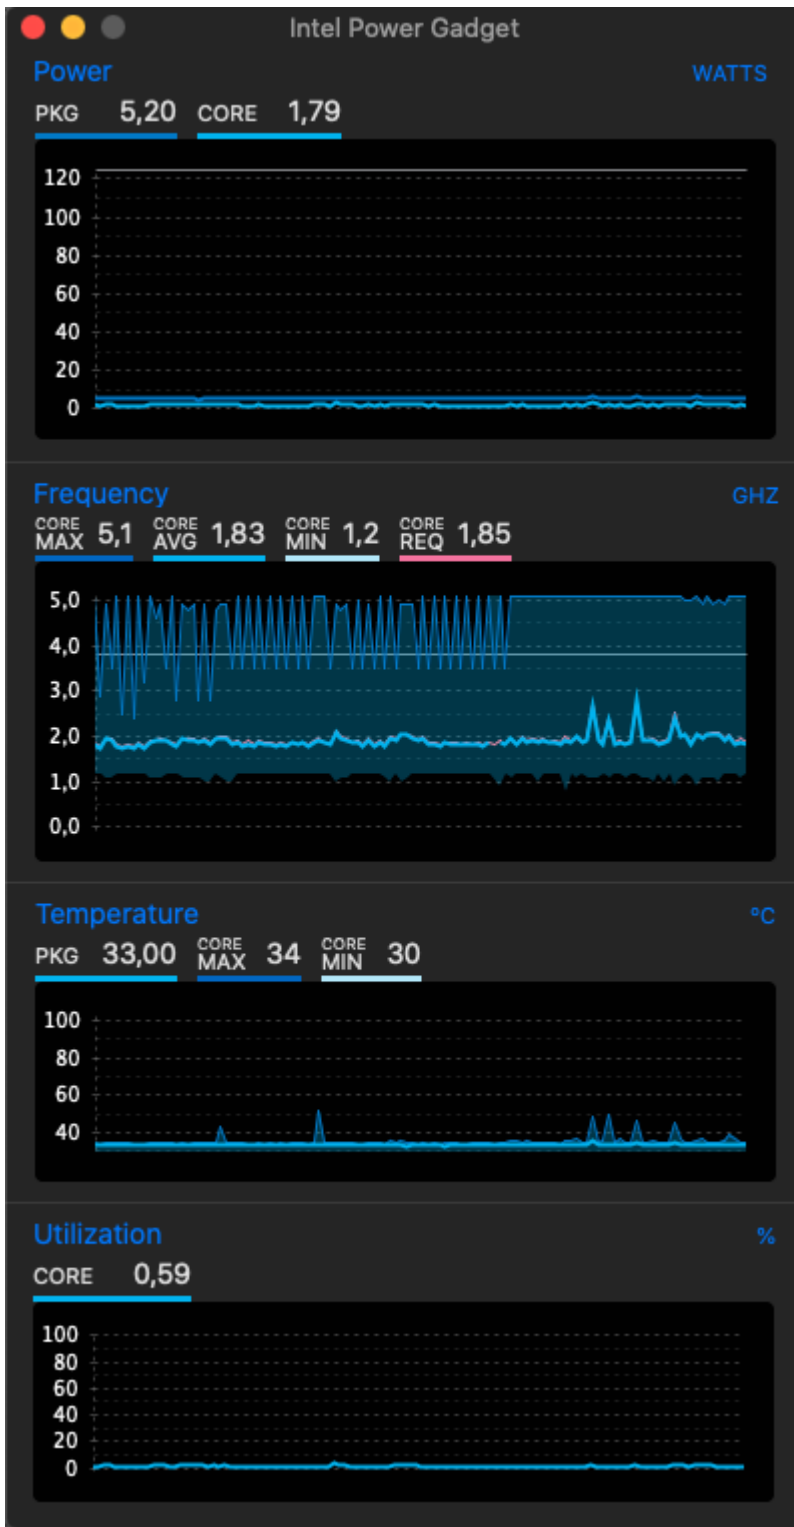

Bluetooth deaktivieren

Geräte

iPhone SE
Verbunden

This screenshot shows the macOS Bluetooth settings window. On the left, there is a large blue Bluetooth icon with the text 'Bluetooth: Ein' (Bluetooth: On) and a button labeled 'Bluetooth deaktivieren' (Turn off Bluetooth). On the right, there is a list of devices under the heading 'Geräte' (Devices). The only device listed is 'iPhone SE', which is marked as 'Verbunden' (Connected).

Der wichtigste Test : Steinberg Cubase 10 Pro läuft einwandfrei!

Version 10.0.60 - Built on Feb 25 2020
