

HP EliteBook 840 G1 & OpenCore Catalina/Big Sur

Beitrag von „gingerbread“ vom 6. September 2020, 21:09

I have everything working on my 840G1 with Catalina and Opencore. But for some reason, I cannot tell if my NVRAM is working. On my other laptop; HP 450 G5, if my select control and macos at the opencore picker, it makes it default. But on my 840 G1, it does not stick. Any ideas?
