

# OpenCore Sammelthread (Hilfe und Diskussion)

**Beitrag von „OblakoLive“ vom 7. September 2020, 12:51**

Hello, tell me, did someone install opencore for lynnfield processors, p55 motherboards? Specifically, I'm wondering if anyone knows how to make opencore 0.6.0 (1) work for asus p7p55d pro + Xeon x3470 + rx5700xt. This worked for opencore 0.5.8 for sure and still works for any clover version.
