

# [Sammelthread] MacOS BigSur 11.0 DEV-Beta Erfahrungen

Beitrag von „Macko“ vom 7. September 2020, 20:05

Who needs a similar EFI on a Gigabyte B150N motherboard here.

New boot icons and the latest kext are inserted. I installed Big Sur beta 6 with it.

Special thanks to the members of this forum karacho and &.

If it was that simple, we wouldn't have fun ....
