

Clover 5121 Startet nicht

Beitrag von „OSX-Einsteiger“ vom 8. September 2020, 21:20

[Lisa Locke](#)

Habt ihr das so probiert einzustellen

<https://dortania.github.io/Ope...plist/haswell.html#booter>

```
Quirks                                # Dictionary 17 key/value pairs
AvoidRuntimeDefrag                    # Boolean True
DevirtualizeMmio                      # Boolean False
DisableSingleUser                     # Boolean False
DiscardHibernateMap                  # Boolean False
EnableSafeMadviseSlide               # Boolean True
EnableWriteUnprotector               # Boolean True
ForceElfBootServices                 # Boolean False
ProtectMemoryRegions                 # Boolean False
ProtectSecureBoot                    # Boolean False
ProtectUEFI Services                 # Boolean False
ProvideCustomSlide                   # Boolean True
ProvideMaxSlide                       # Number 0
RebuildAppleMemoryMap                # Boolean False
SetupVirtualMap                      # Boolean True
SignalAppleOS                        # Boolean False
SyncRuntimePermissions                # Boolean False
```
