

ASUS Maximus XII Formula Z490 + OpenCore

Beitrag von „lg777“ vom 15. September 2020, 11:46

Which version of macOS did you try to install? Catalina or Big Sur?

This is not going to work that way either! You have to adjust the data (see screenshot)

You have to follow these instructions: <https://dortania.github.io/Opencore-Bootcamp/creating-your-config-plist>
