

[Sammelthread] MacOS BigSur 11.0 DEV-Beta Erfahrungen

Beitrag von „Arkturus“ vom 27. September 2020, 15:37

Schau mal in der config.plist nach [ScanPolicy julian91](#)

Note: Given the above description, 0x0103 value is expected to allow scanning of SATA, SAS, SCSI, and NVMe devices with **APFS** file system, and prevent scanning of any devices with HFS or FAT32 file systems in addition to not scanning **APFS** file systems on USB, CD, and FireWire drives. The combination reads as:
