Tinu bricht Stick Erstellung mit Catalina ab.

Beitrag von „ITzTravellnTime“ vom 28. September 2020, 03:53

About TINU, i am the developer of it, and i maintain the project on github, and the download here is just an outdated and very buggy version, you can find the github page repo here and you can open an issue there if you need any help from me:
<https://github.com/ITzTravellnTime/TINU>

There is also version 3.0 of tinu currently in development, which now has reached BETA 3, a BETA 4 is very close to release, so keep an eye open for that.
