## Ozmosis mit macOS Catalina 10.15 - OZ167X-XMAX (extended)

Beitrag von „Raptortosh“ vom 29. September 2020, 05:18

You can also Use clover, or (better) opencore: [Z97X UD5H & Z97X UD5H Bk](#)

In OZ, there is fakesmc Kext, and defaults, Which should work for install 😊
