GA-Z97X-UD3H + e3 1245 v3 into OC

Beitrag von „apfel-baum“ vom 2. Oktober 2020, 19:40

hello,

in case of oc you'll need to flash a stock- of course imho , or an "new" oz which is used with your board latest would be the xmas- section i think.

which oz build have you currently in use and which version of osx should be installed?
