Hi, Zayed4502 try out my new OC EFI..

[Razor12](#) Hi, I used you new EFI, and thank you very much, all of my problems are actually solved now, I added USBInjectAll.kext to my efi and everything works now, the only question I have is: will the sd card reader work?

I have a linux partition on my laptop as well, I know that to add it to the efi config.plist, I have to add the `ssdpath/efipartitionpath/EFI/ubuntu/grubx64.efi`

I have the `ssdpath` of my laptop, `"Acpi(PNP0A03,0)/Pci(1F|2)/Sata(Port 0)/"`

and I have a partial of the `efipartitionpath`, `"HD(Part1,SigA468E960-53D8-48A6-9286-B42E04"` but I cannot find the rest, I pulled this off of the "boot from efi selection" on boot menu. How do I find the whole `efipartitionpath` using MacOS/linux?

EDIT: thanks for the sd card knowledge.
