

macOS 11 BigSur Dev-Beta Clover Patch

Beitrag von „Raptortosh“ vom 5. Oktober 2020, 17:42

For Beta 9, there are no patches, because PrelinkedKernel doesnt exist anymore (i checked, and booter-fileset also doesnt exist anymore in Boot.efi).

Beta 8, dont know.

Old kext injection isn't working now with Kernelcollections (kc).

In my Tests with [cecekpawon](#) , KernextPatcher didnt Patch KC, or didnt find it.
