

# Boot mein Hirn

Beitrag von „timmtomm“ vom 7. Oktober 2020, 21:51

[Atalantia](#) laut der Info hier ist der Mac Os Catalina Support seit der Version R4 (2019) integriert:

<http://www.dailycadcam.com/e-o...vue-plantfactory-2019-r4/>

*"Other notable new features in VUE and PlantFactory R4*

*As with previous quarterly releases, e-on software has also added many other new features and UI/UX enhancements such as:*

- 1. Rewritten and optimized FBX format import,*
- 2. Substance compatibility enhancements: support for multi-graph .sbsar, updated SDK to version 7, support for animated .sbsar files, support for several additional .sbsar inputs,*
- 3. Path tracer renderer now supports orthographic projection, film offset and renders multi-pass channels,*
- 4. New LOD selection mechanism based on referenced length,*
- 5. Numerous updates to Python scripting options,*
- 6. **Added compatibility with MacOS Catalina,***
- 7. And a lot more"*

Aktuell ist die Version R5 (Juni 2020), also wenn Du nicht eine noch ältere Version nutzt, dann steht auch aktueller Hardware nichts im Wege ...
