

Perfectionist needs help (DSDT)

Beitrag von „valenb“ vom 11. Oktober 2020, 07:34

First of all, sorry for writing in english, i dont know where else to ask. hi! so i have my hp x360 on catalina with opencore 0.6.1. everything is running ok so far, but since i'm a perfectionist i want to compile my own DSDT. I've managed to boot and install big sur, MaciASL says there is not errors, [but when i boot it stops at this error](#). Any help is thanked! [here are the DSDTs](#).
