

DRM Compatibility Chart for 10.15

Configuration	Mode	iTunes Trailers	iTunes Movies	TV+	Prime Trailers	Prime/Netflix	QSV
AMD+iGPU, iMacPro	integrated	SW1	SW2	HW4	HW3	NO	OK
AMD+iGPU, iMacPro	integrated	SW1	SW2	HW4	HW3	HW3	OK
AMD, iMacPro		SW1	SW2	HW4	HW3	HW3	NO
AMD, iMacPro	integrated	HW1	HW2	HW4	HW3	HW3	NO
NI+iGPU, iMacPro		SW1	SW2	NO	HW	NO	OK
NI, iMacPro	integrated	SW1	SW2	SW3	HW	NO	NO
iGPU, iMacPro		SW1	NO	NO	HW	NO	OK

- SW - software unencrypted decoder, works everywhere
- HW - hardware unencrypted decoder, works with any compatible GPU
- SW1 - software FairPlay 1.0 decoder (ConFF)
- SW2 - software FairPlay 1.0 decoder (ConFF), requires HDCP
- SW3 - software FairPlay 4.0 decoder (ConLKD), requires HDCP and no iGPU
- HW1 - hardware FairPlay 1.0 decoder (ConFF), requires select AMD GPUs
- HW2 - hardware FairPlay 1.0 decoder (ConFF), requires HDCP and select AMD GPUs
- HW3 - hardware FairPlay 2.0/3.0 decoder (ConLKD/SE), requires HDCP and select AMD GPUs
- HW4 - hardware FairPlay 4.0 decoder (ConLKD), requires HDCP and select AMD GPUs
- iMacPro - iMac/MacPro models with iGPU. iGPU must have connector-less framebuffer if other AMD/NIU is used.
- iMacPro - iMac/MacPro models without iGPU.
- Other configurations are used at your own risk, use `utilsdiff` to disable modifications

dann klappt es auch, Performance von der GPU ist die selbe die man mit einem iMacPro SMBios hat, dazu kommt noch das die richtigen FrequenzVektoren der CPU laufen.

@[phialek](#) da du aber ein F Modell hast ohne iGPU bleibt dir nur das SMBios iMacPro1,1.
