Brauche Hilfe bei Catalina auf Gigabyte Z490 Gaming X (Clover)

Beitrag von „Bob-Schmu“ vom 18. Oktober 2020, 19:28

Probier es mal damit <https://dortania.github.io/OpenCore-Install-Guide/>

Die iGPU muss aber connector-less mit laufen sonst klappt Netflix usw nicht

DRM Compatibility Chart for 10.15

Configuration	Mode	iTunes Trailers	iTunes Movies	TV+	Prime Trailers	Prime/Netflix	KiTV
AMD+iGPU, BIOS/M	software	SW1	SW2	HW4	HW	NO	OK
AMD+iGPU, BIOS/M	software	SW1	SW2	HW4	HW3	HW1	OK
AMD, iAP/MP		SW1	SW2	HW4	HW3	HW1	NO
AMD, iAP/MP	software	HW1	HW2	HW4	HW3	HW1	NO
HW+iGPU, BIOS/M		SW1	SW2	NO	HW	NO	OK
HW, iAP/MP	software	SW1	SW2	SW3	HW	NO	NO
iGPU, BIOS/M		SW1	NO	NO	HW	NO	OK

- SW - software unencrypted decoder, works everywhere
- HW - hardware unencrypted decoder, works with any compatible GPU
- SW1 - software FairPlay 1.0 decoder (CoreFF)
- SW2 - software FairPlay 1.0 decoder (CoreFF) requires HDCP
- SW3 - software FairPlay 4.0 decoder (CoreLDR), requires HDCP and no iGPU
- HW1 - hardware FairPlay 1.0 decoder (CoreFF), requires select AMD GPUs
- HW2 - hardware FairPlay 1.0 decoder (CoreFF), requires HDCP and select AMD GPUs
- HW3 - hardware FairPlay 2.0/3.0 decoder (Core,SKOMSE), requires HDCP and select AMD GPUs
- HW4 - hardware FairPlay 4.0 decoder (CoreLDR), requires HDCP and select AMD GPUs
- BIOS/M - Mac/Macmini models with iGPU; iGPU must have connector-less framebuffer if when AMD/HW is used
- iAP/MP - MacPro/MacPro models without iGPU
- Other configurations are used at your own risk, use -kirkoff to disable modifications
