

X299 Tutorial - ASUS WS X299 SAGE/10G (Hilfe und Diskussionen)

Beitrag von „mokapuccino“ vom 22. Oktober 2020, 14:53

Hi,

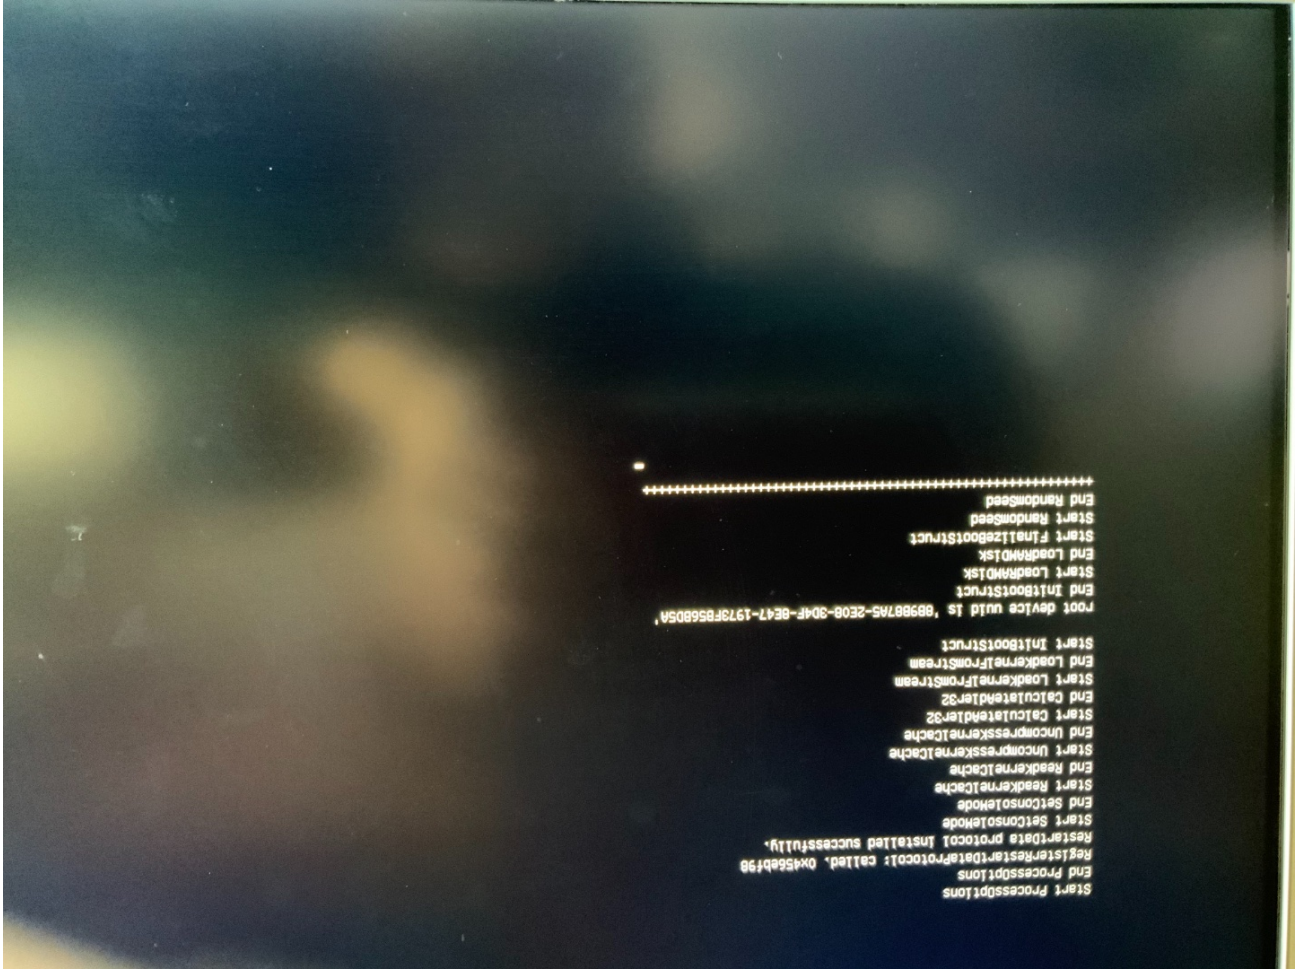

I'm already on my hack install.

Since 2 days, I can't go further than this step « end randomseed »

Q-code of motherboard is « 61 » --> nvram initialization

I try different methods with (emuvariableuefi or osxaptiofix) with no results

bit thanks for your help

Sorry for picture, it's automatically reverse, I can't fix
