

[Sammelthread] MacOS BigSur 11.0 DEV-Beta Erfahrungen

Beitrag von „5T33Z0“ vom 26. Oktober 2020, 18:35

[Arkturus](#) : Oh, entschuldigung. Stimmt, es gibt sie seit 0.6.2, wie ich am 07. Oktober in meinem Update Guide notiert habe:

```
#####
```

```
# OC Config Compare #
```

Sample.plist Changes from OC 0.6.1 to 0.6.2

```
#####
```

Checking for values missing from User plist:

Sample.plist -> Kernel -> Emulate - Missing Key: DummyPowerManagement

Sample.plist -> Kernel -> Emulate - Missing Key: MaxKernel

Sample.plist -> Kernel -> Emulate - Missing Key: MinKernel

Sample.plist -> Kernel -> Quirks - Missing Key: ExtendBTFeatureFlags

Sample.plist -> Kernel -> Quirks - Missing Key: LegacyCommpage

Sample.plist -> PlatformInfo -> Generic - Missing Key: SystemMemoryStatus

Sample.plist -> PlatformInfo -> Generic - Missing Key: ProcessorType

Sample.plist -> UEFI -> ReservedMemory -> Array - Missing Key: Type

>> Action: Copy above entries from sample.plist to user config.plist when updating from v 0.6.1 to 0.6.2

Checking for values missing from Sample:

Sample.plist -> Kernel -> Quirks - Missing Key: [DummyPowerManagement](#)

>> [Move entry from Kernel > Quirks to Kernel > Emulate.](#)
