

Lenovo Thinkpad T530

Beitrag von „5T33Z0“ vom 28. Oktober 2020, 15:56

1. For installing macOS NO modified BIOS is necessary!!!
2. Just update the regular BIOS to the latest Version!
3. A modified BIOS is ONLY necessary for whitelisted Networkcards!
4. If you want to UNLOCK your BIOS you can use **1vyrain** which is a software jailbreak.
