Lenovo Thinkpad T530

Beitrag von „5T33Z0" vom 28. Oktober 2020, 16:29

Of course. First of all it's a compatible wifi card, 2nd of all, if the whitelist is removed there are no restrictions for the wifi cards anyway.

There's a thread for making intel cards work, but it's experimental and only works with some cards and is in german of course: [Intel Wİ-Fİ: es wird spannend!](#)

But like I said before, Installing MacOS doesnt require the BIOS unlock.
