

Bitte um Hilfe, Mojave bleibt beim booten hängen

Beitrag von „5T33Z0“ vom 30. Oktober 2020, 20:22

"If you get an error within the installation saying something like "this installation is damaged" you can try this workaround: Delete InstallInfo.plist on the installer disk:

- Open the "Install macOS Catalina" Disk
- Right Click on the package "Install macOS Catalina"
- Click on "Package Contents"
- Then navigate to Contents > SharedSupport
- Delete the InstallInfo.plist"
