

Lenovo Yoga X390 - BuildActDeviceEntry exit

Beitrag von „Zack“ vom 31. Oktober 2020, 19:02

Danke für die Config, leider startet der Rechner so nur ins Windows 10, OpenCore ist jetzt aber Auswählbar beim Booten.

```
ES: Starting OpenCore...
ES: booter path - EFI\OC\bootrap\bootrap.efi
OCFS: Trying to locate filemgmt on C:\OCFS\0F1109
OCFS: Filemgmt IP is EFI\OC\bootrap\bootrap.efi
ES: Trying to start loaded OpenCore image...
ES: Failed to locate bootrap protocol - Not Found
ES: Trying to load OpenCore image...
ES: Read OpenCore image of 79724 bytes
ES: Loaded OpenCore image at C:\OCFS\0F1109 handle
OCFS: TSC Adjust 0
OCFS: Read Model Core Crystal Clock Frequency 2000000
OCFS: CPUfrequency/rom/01 185600000Hz 1856MHz - 2000000
OC: Starting OpenCore...
OC: booter path - Gz1D
OC: booter from bootrap
OC: Refuse macrotail
OCFS: Missing smit data. Ignoring...
