

[Sammelthread] MacOS BigSur 11.0 DEV-Beta Erfahrungen

Beitrag von „schmalen“ vom 31. Oktober 2020, 22:35

[julian91](#) gibst im Terminal des RC mod den Befehl ein zum Schluss musst du nat. dein Volumennamen eingeben bei mir ist es BigSur

```
Terminal - kmull > patch-beta.sh /Volumes/BigSur --11.0.0
-bash-3.2# /Volumes/BigSur/Volumes/patch-beta.sh /Volumes/BigSur/BigSur
No patch mode specified on command line; defaulting to --20.0.
Installing beta to:
/Volumes/BigSur/BigSur
Unable to find the volume.
Cannot proceed. Make sure you specified the correct volume.
-bash-3.2# /Volumes/BigSur/Volumes/patch-beta.sh /Volumes/BigSur/BigSur
No patch mode specified on command line; defaulting to --20.0.
Installing beta to:
/Volumes/BigSur/Volumes/BigSur
Unable to find the volume.
Error: diskutil: beta mode not supported for volume "/Volumes/BigSur/BigSur".
No patch mode specified on command line; defaulting to --20.0.
Unable to beta to:
/Volumes/BigSur

Volume appears to have a Big Sur installation (UUID 26A29F94-). Continuing.
Volume is mounted from device: /dev/disk0s1
Mounting device to its actual name, not a snapshot. Proceeding.
Successfully disabled System Integrity Protection.
Please restart the machine for the changes to take effect.
Successfully disabled automatic disk repair.
Please restart the machine for the changes to take effect.
Mounting volume as read-write...
Mounting for NormalDiskImage backup...
Mounting not found. Performing backup now. This may take a few minutes.
Starting up volume: NormalDiskImage 0x1
/Volumes/BigSur/BigSur
* Mounting /Volumes/BigSur
Installing patch 2000100011_beta
Using model: 2019,001
