

HP EliteBook 840 G1 & OpenCore Catalina/Big Sur

Beitrag von „Swoze“ vom 1. November 2020, 00:54

Hello everyone been following this thread in the last weeks and im trying to make an opencore config for the first time on my HP EliteBook 840 G1. I tried to follow your tutorial and dortania's but with the forum EFI or dortania tutorial, i cant boot to install Catalina, every time i try i get the following error

```
[EB]`B:WFDW] Err(0xE), 0 @ LocHB 71B4903C-14EC-42C4-BDC6-CE1449930E49
```

Anyway to fix? In attach i send my EFI, thank you so much in advance, such an amazing community
