

[Sammelthread] MacOS BigSur 11.0 DEV-Beta Erfahrungen

Beitrag von „badbrain“ vom 6. November 2020, 13:52

This is not a message from OpenCore, but from a third-party app such as the OpenCore Configurator, which is not supported by OpenCore, as it can make your configuration unusable. Instead, you should use a plist editor like PlistEdit Pro or PLIST Editor.
