

In Arbeit

Intel HD Graphics 2500 (QE/Unterstützt, Funktionsset macOS GPUFamly1 v3 & v4)

Beitrag von „asadal12“ vom 8. November 2020, 05:45

Code

1. Hey, I used your specified Efi but when I boot into Mac OS with fake ID 0x1245678 and GPU platform ID 0x0166000a it boots but I only get 7MB display when I change the fake ID in the tutorial mentioned . I get a black screen with the mouse pointer.
2. Specifications:
3. Intel desktop board dq77mk
4. Intel HD 2500
5. i5 3450
