Hi, ich glaube ich bin da auf was gestoßen:

UAD Forum Zitat:

## **Apple Thunderbolt 3 to Thunderbolt 2 Adapter Notes**

- The Apple Thunderbolt 3 to Thunderbolt adapter (Product ID: MMEL2AM/A) has been found to be incompatible with certain Windows systems in our internal testing. As a result, we do not recommend this adapter for Windows Thunderbolt systems.
- The Apple adapter is incompatible with hot-plugging the adapter into the computer's Thunderbolt 3 port. However, the adapter is compatible with hot-plugging the Thunderbolt cable into the adapter.

Ich werde mir jetzt einen anderen Adapter bestellen und dann berichten.

Grüße
