Ausserdem hab grad nachgeguckt...

\_OSI heisst auf meinem Rechner 5f4f5349

Sequence

|                 |             |
|-----------------|-------------|
| Hex:            | 5f4f5349    |
| Hex (reversed): | 49 53 4F 5F |
| Base64:         | X09TSQ==    |
| ASCII:          | _OSI        |

Auf deinem Rechner tust du unter dem Label \_OSI irgend einen kauderwelsch rechnen.. 😊

Sequence

|                 |                   |
|-----------------|-------------------|
| Hex:            | E5FE1FE7 7E3D     |
| Hex (reversed): | 3D 7E E7 1F FE E5 |
| Base64:         | 5f4f5349          |
| ASCII:          | âþç~¼             |

So kann es nicht funktionieren 😊

Versuch mal die zu korrigieren 😊

Gruss Coban
