Ich habe es gerade hin bekommen...

Habe ich vollkommen übersehen auf GitHub Seite ganz unten 😞

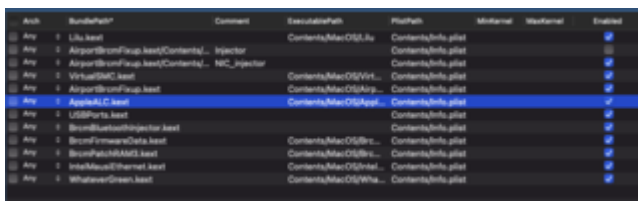

Hier kurz zusammengefasst wie ich es gemacht habe.

Habe bei DeviceProperties folgendes eingetragen. Ob das jetzt hilfreich ist und ob es auch ohne den Eintrag geht habe ich noch nicht getestet.

Name	Key	Value	Type
NetworkController (PCI0x18, Slot)	AAPL,slot-name	Internal@PCIE, Slot	STRING
NetworkController (PCI0x18, Slot)	PCConfigurations	00	DATA
NetworkController (PCI0x18, Slot)	hw/country	DE	STRING
NetworkController (PCI0x18, Slot)	hw/country	DE	STRING
NetworkController (PCI0x18, Slot)	hw/usb	00	DATA
NetworkController (PCI0x18, Slot)	compatible	pci14e4,4301	STRING
NetworkController (PCI0x18, Slot)	device_type	Network controller	STRING
NetworkController (PCI0x18, Slot)	model	BCM4302 802.11ac Wireless Network Adapter	STRING
NetworkController (PCI0x18, Slot)	name	AirPort Extreme	STRING

Danach die Kette im Clover Configurator neu geladen und den Kext **AirPortBrcm4360_Injector.kext** deaktiviert.
