

ASUS Rampage VI Extreme (original) with Radeon VII

Beitrag von „Ghostmac1969“ vom 21. November 2020, 17:25

[juantrix](#)

Congrats. With your Radeon VII SSDT my hack is now quite stable. I can say that as I'm running a duplicate finder since 5 hours on my principal repo (more than 2 TB data) w/o reboot and/or kernel panic. The only problem to solve is now the audio on DP. The related controls are missing along with the audio itself ...
