Hacintosh möglich?

Beitrag von „Leandro2427“ vom 22. November 2020, 12:08

I am planning to make a hacintosh out of my Windows machine. It is the first time that I am doing something like that. I have found a video by technolli, which shows what to do with a quite similar configuration. (<https://youtu.be/bFDDc7hQJKg>) Now my primary question is if I can just follow the tutorial and if not what adjustments have to be made.

Thanks in advance!
