

HP EliteBook 840 G1 & OpenCore Catalina/Big Sur

Beitrag von „Zayed4502“ vom 26. November 2020, 19:14

[Zitat von xerano](#)

thats crazy our 840 G1 works nearly perfectly in Big Sur. can u post your Verbose?

[user = '64831'] Razor12 [/ user] if it should be an M.2 card, I think you are well advised with the DW1820A or BCM94350ZAE .

[gingerbread](#) maybe u can try the HPFanReset.efi [HPFanReset-2013-1205.efi.zip](#)

[xerano](#) it turned out that macos had a couple of things disabled, the notification sounds are there working properly, and they turned off the plug in chime, its easy to turn it back on though, just a simple google.
