

„One more thing“ Apple Event 10. November

Beitrag von „badbrain“ vom 27. November 2020, 16:14

[lalalalala](#) Da kannst du dann Big Sur so oft neuinstallieren bis du schwarz wirst. Das ist nämlich kein Bug, sondern ein Feature, weil Big Sur aus Sicherheitsgründen eben immer von einem Snapshot bootet.

Zur Neuinstallation: <https://support.apple.com/de-de/HT211983>

Zitat von <https://mrmacintosh.com/how-to-reinstall-macos-on-your-apple-silicon-mac-everything-you-need-to-know/>

Internet Recovery is DEAD on Apple Silicon.

Right off the bat, we need to understand that Mac Internet Recovery on Apple Silicon is DEAD! Finally you don't have to worry about IR errors and the problems that come with them.

Internet Recovery will still remain for Intel based Macs. For Apple Silicon we now have 4 different ways to reinstall macOS.

- 1. **macOS Recovery** = First line of recovery.
- 2. **System Recovery** = Hidden partition for when normal macOS recovery is not available.
- 3. **macOS Big Sur USB Installer Drive.** = Boot to a createinstallmedia based Big Sur full installer.
- 4. **macOS System Restore via DFU mode** + Apple Configurator 2.
