Steht doch in der Beschreibung:

"Kernel extension for **blocking unwanted processes causing compatibility issues on different hardware**. Currently includes:

- /System/Library/CoreServices/MemorySlotNotification
- /usr/libexec/dp2hdmiupdater
- /usr/libexec/efiupdater
- /usr/libexec/firmwarecheckers/eficheck/eficheck
- /usr/libexec/sdfwupdater
- /usr/libexec/smcupdater
- /usr/libexec/ssdupdater
- /usr/libexec/usbcupdater
- /usr/libexec/vbiosupdater"
