

RX 6xxx(XT) Thread, Lieferbarkeit, Kompatibilität, Leistung

Beitrag von „fabiosun“ vom 28. Dezember 2020, 08:20

[kexterhack](#)

much much much luck 😊

6900xt Reference card about 999\$ (impossible for me to take one on AMD site when available in stock)

Asus Tuf Custom 6900xt on amazon US 1149 \$ (with luck I have ordered one on 24th December at cost I have written above) translated in euro about 1242

reference card in Europe (if available) about 1050 euro (in eBay 1300)

I think Asus Custom 6900 Xt card if available in Europe will be about 1200 euro

So 1242 is a right markup if we consider availability and the safety we have buying on amazon.

I am also sure that it is a crazy cost..but in this time if you want it..it costs so much

A friend of mine (very lucky) has found a 6800 xt Merc 319 on amazon.it for about 931 €

MSRP was about 799 \$ so..for now those prices are the best we can find.

I just wanted to understand this with you, because with this crazy market I think 1242 euros is a great price

By the way, the same day that I managed to order it on amazon.com, several American users did the same

Check on ebay how much they try to resell it .. they only paid 1149 dollars for it
