waiting for me to get my hands on a 6900xt,

I would like to offer you this consideration

on my vega 64 With Davinci resolve Studio and the Candle benchmark.

OS 11.1 (Davinci 17.1 beta 6)

Metal

66 noise nodes @ 16 Fps

6TRN nodes @ 21 Fps

OpenCL

66 noise nodes @ 9 Fps

6TRN nodes @ 7 Fps

Windows 10 Pro 64 bit (latest)

OpenCL:

66 noise nodes 12/13 fps

6TRN nodes 17/18/19

a 6900 xt

OpenCL:

66 noise nodes 20/20 fps

6TRN nodes 30/31

Taking a proportion of how much my Vega 64 is better under Metal..the 6900xt in Davinci shouldn't go as bad as various sites are saying these days .. or not?

AMD opened for ten minutes their shop site 😊😊
