

RX 6xxx(XT) Thread, Lieferbarkeit, Kompatibilität, Leistung

Beitrag von „fabiosun“ vom 10. Januar 2021, 12:23

I hope that if OSX support arrives, there will be added value on Metal and therefore some situations will be rebalanced even for use with software such as DaVinci Resolve or others, where today, Nvidia wins even with lower level cards.

I am confident that in windows it is also a driver problem ...

we'll see!
