

RX 6xxx(XT) Thread, Lieferbarkeit, Kompatibilität, Leistung

Beitrag von „fabiosun“ vom 10. Januar 2021, 16:08

[Bob-Schmu](#)

don't take this illusion away from me 😊

I have my own tests with Davinci Resolve and my Vega 64

With OpenGL and davinci I have much lower results in OSX than Metal and comparable but always lower than metal in windows (in windows only in OpenGL of course)

I hope so 😊

also because in a few days I will have an XFX Speedster 6800 xt and an AMD 6900 Xt reference..and I wouldn't want to give them both away to get an RTX 3090 😊😊
