

OpenCore Themes

Beitrag von „cobanramo“ vom 12. Januar 2021, 14:43

Da ist mir auch ein kleiner Fehler unterlaufen, da ich Nighly Version einsetze ist das bei mir untergegangen zu erwähnen.

Bedenkt einfach das die Background erst ab 0.6.6 läuft aber die Icon Geschichte schon im 0.6.5 vorhanden ist...

- 
- The image shows a screenshot of the OpenCore Themes changelog. It is divided into two sections: v0.6.6 and v0.6.5. In the v0.6.6 section, the first two items are circled in red: 'Added keyboard and pointer entry scroll support in OpenCanopy' and 'Added background image support in OpenCanopy'. In the v0.6.5 section, the last two items are circled in red: 'Implemented MP3 audio decoding for audio assistant support' and 'Added support for Ficker/Variant for more theme variants'.
- v0.6.6**
 - Added keyboard and pointer entry scroll support in OpenCanopy
 - Added background image support in OpenCanopy
 - Fixed selector boot option choice in OpenCanopy
 - Relaxed selector dimensions for OpenCanopy
 - Add RealtekRTL8125 option to kexts.kc
 - Fix MLB verification feature in macorecovery
 - v0.6.5**
 - Fixed installing OpenDuet on protected volumes
 - Updated underlying EDK II package to edk2-stable202011
 - Updated builtin firmware versions for SMBIOS and the rest
 - Fixed macorecovery server protocol compatibility
 - Added basic audio assistant support in OpenCanopy
 - Added compiled ACPI samples to the package
 - Fixed timer resolution restoration at boot time
 - Fixed memory capacity when using custom SMBIOS memory config
 - Removed no longer required `AppleLidController.kext` quirk
 - Fixed macserial crashes when processing invalid serials
 - Fixed macserial issues when processing 2021 year serials
 - Added advanced error checking in `ocvalidate` utility
 - Added `settablelay` to configure audio setup delay
 - Reworked `LogoutHook` command to support older macOS
 - Implemented MP3 audio decoding for audio assistant support
 - Added support for Ficker/Variant for more theme variants
 - Added `OC_ATTR_HDMI_THERM_ICONS` `Ficker/Variant` for Time Machine
 - Fixed OpenUnRAR compatibility with certain keyboards
