

# OpenCore Sammelthread (Hilfe und Diskussion)

Beitrag von „5T33Z0“ vom 15. Januar 2021, 19:42

Jemand hatte gefragt weden dem neuen HFS+ Treiber, OpenHFSPlus:

"HFS file system driver with bless support. This driver is an alternative to a closed source HfsPlus driver commonly found in Apple firmware. While it is feature complete, **it is approximately 3 times slower** and is yet to undergo a security audit."

Lohnt (noch) nicht, umzusteigen.
