[Sammelthread] MacOS BigSur 11.0 DEV-Beta Erfahrungen

Beitrag von „Macko" vom 26. Januar 2021, 22:30

MacGrummel,Hi, I used Clover in Catalina and Mojave. Clover didn't work in Big Sur at the beginning, so I started using OpenCore. Clover was better at customizing. Does the sound control the monitor directly through the upper control panel???

If so, and Clover can be used to boot today, I'll go back to Clover. OpenCore is a disaster for those who do not understand it very well.

I see it have the same graphics, can I give me an EFI file?
