

# Big Sur mit OC auf ThinkPad X270

Beitrag von „rflrkn“ vom 3. Februar 2021, 21:17

So - ich hol den Thread hier jetzt nochmal aus der Versenkung.

[Laut Voodool2C-Gitter-Chat](#) handelt es sich bei meinem Trackpad wohl doch um ein PS2-Trackpad - wirklich verstehen was das bedeutet tu ich nu aber leider nicht so recht. Mit VoodooRMI bekomme ich jedenfalls schon beim Systemstart ne Kernelpanic.

Kann da noch wer aufklären und helfen?

Hier noch der Output von `dmesg` und `xinput` von meinem Laptop.
