

OC DELL Latitude E6420

Beitrag von „Mo-6420“ vom 7. Februar 2021, 14:55

I have fixed the problem of monitor intel HD 3000 unsupported on macOS Big Sur by these steps:

1-insert the kext,

2-add it on the config OC and boot your PC

you'll see this pic

Good luck and Enjoy

PS: for the Vram 4Mo this is not a problem the macOS Big Sur is clean and with a full scree
