

i9 10900k / Gigabyte Z490 Vision D - Er läuft

Beitrag von „ildar“ vom 11. Februar 2021, 20:27

Hi Mauti, ich war ne Zeit lang Offline. Es ist schon Disabled gewesen! Hab grad mit diesem << pmset -g log | grep -e "Sleep.*due to" -e "Wake.*due to" >> Befehl einen neuen Log erstellt.

```
2021-02-11 20:18:14.4638 Sleep      Sleeping Sleep state due to "Hardware Sleep at 100%" using AC (Charge-90) 20 mins  
2021-02-11 20:18:14.4638 Awake      Awake From Normal Sleep (20%) due to AC (PS3) using AC (Charge-90) 3 mins  
2021-02-11 20:18:14.4638 Sleep      Sleeping Sleep state due to "Hardware Sleep at 100%" using AC (Charge-90) 43 mins  
2021-02-11 20:18:14.4638 Awake      Awake From Normal Sleep (20%) due to Inactivity Assertion using AC (Charge-90) 43 mins  
2021-02-11 20:18:14.4638 Sleep      Sleeping Sleep state due to "Hardware Sleep at 100%" using AC (Charge-90) 20 mins
