Good afternoon [REDACTED], all right? I need feedback on the PROJECT I'm setting up, especially on PC CONFIGURATION. I'm a bit of a layman, but with a little knowledge and experience I have, I managed to achieve this result.

Feedback

1 - If someone sees that they have the possibility to replace some item that I have already chosen with another one on the market that is better, please leave your suggestion.

2 - I am very concerned with the cooling of the processor, here where I live it heats up a lot and that's why I want to choose water cooler that will handle everything without any problem, together with fans and a favorable case so as not to suffer from heat issues.

3 - If it is 100% compatible with everything.

[REDACTED] NEW SETUP [REDACTED]

[REDACTED] Hardware [REDACTED]

Gigabyte Z490 Vision D, Intel LGA 1200, ATX, DDR4 - Z490 VISION D Motherboard Intel Core i9 10850K processor

(2X) Corsair Vengeance RGB Pro Memory, 32GB (2x16GB), 3200Hz, DDR4 (64GB)

XPG Gammix S11 Pro SSD, 2TB, M.2 PCIe, NVMe, Readings: 3500Mb / s and Writes: 3000Mb / s
